

THINK TECHSMART® FIRST

TechSmart® High-Temp Headlight Harnesses

The Problem: The heat generated by modern OE automotive light bulbs can melt the bulb's connectors.

Our Response: To prevent melting, TechSmart's Headlight Wiring Harnesses have high-temp connectors that can withstand extreme heat. The harnesses also have 14-gauge wire for better conductivity and a "plug & play" feature that lets you plug the harness right between the factory harness and new bulb. You can even use the harness as a pigtail if the original connector is melted. TechSmart's line of headlight harnesses covers the following high-temp bulbs: H1, H3, H4, H7, H9, H11, H13, 9004, 9005, 9006, 9006XS, and 9007.
