## Hybrid and Electric, SMP has you covered

Standard® and Four Seasons® currently offer over 4,000 SKUs for 150 hybrid models and 1,900 SKUs for more than 40 electric vehicles.

Hybrids and EVs are still cars. They use the very same switches, sensors and actuators as gas vehicles, but they also present new opportunities. Batteries need to be heated and cooled, wires carrying high voltage fail and battery contacts corrode. Standard® and Four Seasons® are committed to providing you with the parts you will need to service the next generation of vehicles.

### What's inside the Standard® box... superior design, advanced engineering and EV/Hybrid coverage. What's in your box?

---

Standard® and Four Seasons® have over 50,000 parts that are powertrain neutral. That means the parts are the same whether the powertrain is gas, diesel, hybrid or electric.

## We have over 140 parts for the 2014 Toyota Highlander Hybrid

---

There are 5 million hybrid vehicles on the road, and many of them are more than 10 years old. With two different systems powering the vehicle, hybrids have more components compared to gas vehicles. More hybrids, aging hybrids, and more parts mean that hybrid repair opportunities are growing. Standard® and Four Seasons® already have the parts you're looking for.
