

WHAT'S IN YOUR BOX?

StandardWhatsInYourBox.com

Standard® precision-engineered EGR components help reduce emissions

Exhaust Gas Recirculation (EGR) components are critical to vehicle performance, fuel economy and emission control. That is why Standard® EGR components are precision engineered, manufactured, and tested to restore vehicle performance and keep harmful emissions low.

What's inside the Standard® box... advanced engineering, precision manufacturing, extensive testing, and on-vehicle validation. What's in your box?

Standard's complete EGR Program includes more than 1,300 all-new components including EGR Valves, Solenoids, Valve Vacuum Modulators and EGR Tubes. When the OE fails, trust Standard® to restore vehicle performance and keep the check engine light off for good!

1,300+
SKUs

Standard® has the EGR components required to keep vehicles running clean

100%
TESTED & VALIDATED

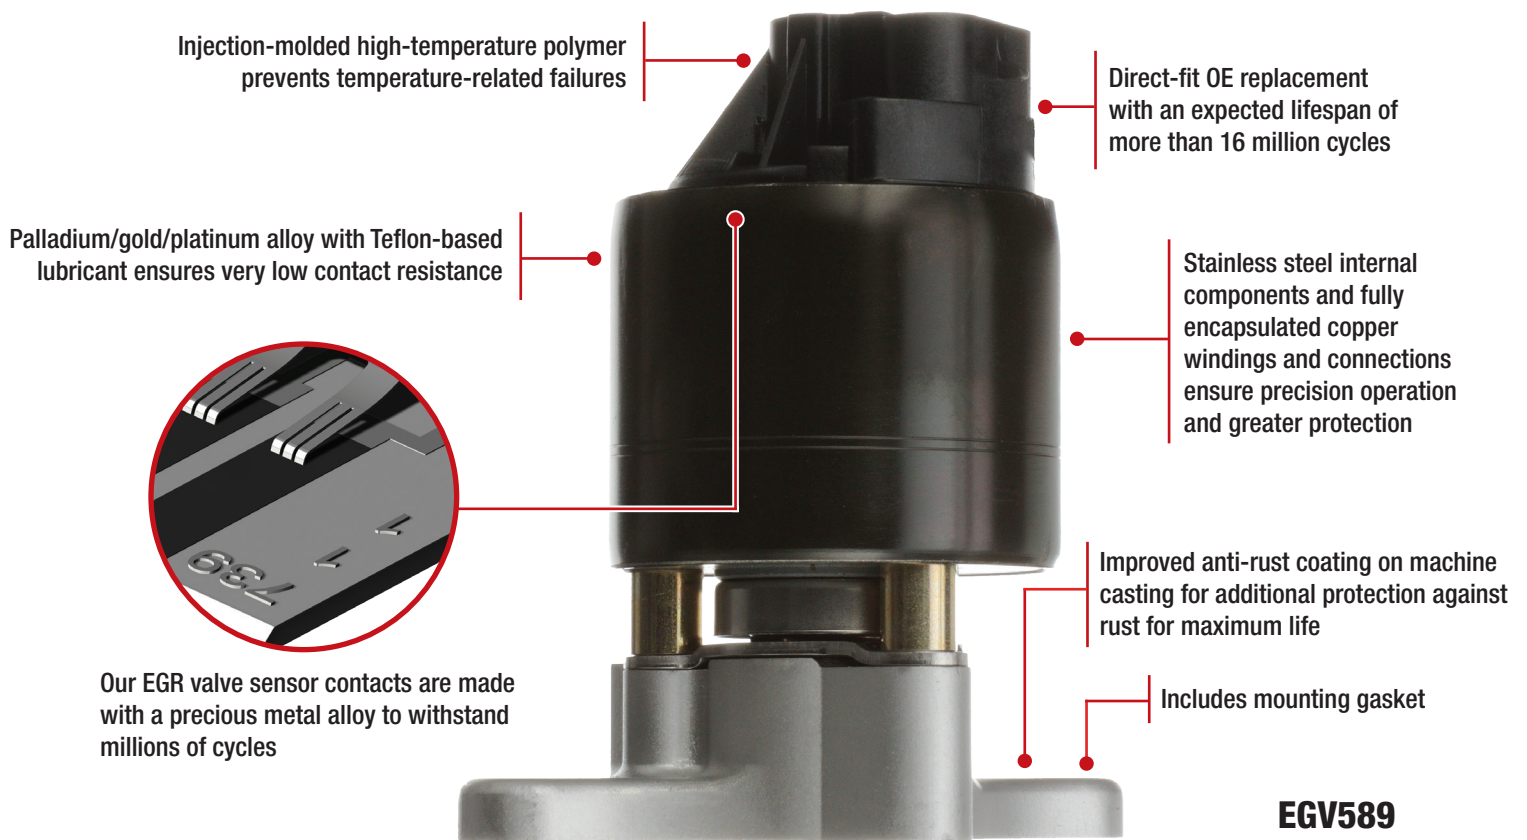

Standard® EGR components are subjected to rigorous lab testing and are validated on actual vehicles

Standard® EGR Valves include a new gasket* for a complete repair

*where required

Standard® EGR Valves are precision engineered and manufactured using only the highest-quality components for correct on-vehicle performance

EGV589

GM Cars, Trucks & SUVs
(2005-93)
VIO: 5.9M

Standard's Exhaust Gas Recirculation Program Includes:

- EGR Control Solenoids
- EGR Coolers
- EGR Tubes
- EGR Valves
- EGR Valve Control Solenoid Filters
- EGR Valve Mounting Gaskets
- EGR Valve Spacer Plates
- EGR Valve Vacuum Modulators

For more than 100 years, when the OE failed, technicians have trusted Standard® to deliver a part that matches OE performance and lasts
