TYPES OF COMBINATION SWITCHES

*“When OE fails...
trust
STANDARD.”*

Late model vehicles combine switch controls onto a single column mounted switch assembly so that the driver has ready access to systems such as windshield wipers and washer, turn signals, headlights, and cruise control. These are all designed within a single multi-function switch so that the driver is able to keep his hands on the steering wheel during adverse weather or driving conditions that would require the use of these systems. Standard carries hundreds of multi-function switches for import and domestic vehicles.

*Additionally, Standard offers many other types of switches including: Cruise Control, Dimmer, Door Jamb, Fog Light, Headlight, Heated Seat, Parking Brake, Power Door Lock, Power Mirror, Power Seat, Power Window, Rear Defogger, Temperature Control, Trunk Release, Turn Signal, Windshield Wiper, **AND MORE!***

*So remember, the next time you need a switch ...
“Buy smart! Buy Standard.”*
