

Standard has
“INTELLIGENT SOLUTIONS”
For Your O2 Business

When the original oxygen sensor fails, it doesn't make sense to replace it with the exact same part that just failed. It's time to upgrade to Standard's Intelligent Solutions oxygen sensors. Standard offers superior coverage and technological improvements over the original. Our smart connectors and exclusive recessed hex body make installation and removal a snap. Precise fit, easy installation and no comebacks. Take it from Einstein, "When OE fails...trust Standard."
