

The Quality You Expect, With a Name You Can Depend On

With OE style boots and exceptional durability, Pro Series delivers the performance expected by today's automotive technicians. Ideal for both import and domestic vehicles, these wire sets meet original equipment specifications and standards.

Pro Series wire are an excellent complement to the full **STANDARD**[®] wire and cable product line.

Snap-Lock Terminals –

Provides a positive connection and resist corrosion. Exceeds SAE pull-off specifications.

Silicone Jacket –

Provides thermal protection from hostile engine environment.

Fiberglass Braid –

Closely woven to provide strength and flexibility to the wire with a strong bond between the jacket and insulation.

EPDM Insulation –

Protects the core and prevents voltage from leaking.

OE Conductive Core Material –

This wire set matches the conductor used on the original wire set for this vehicle.

- Conductive Silicone Core – OE on most domestic vehicles since 1980.
- Magnetic Suppression Core – OE on certain domestic vehicles from 1995.
- Metallic Core – OE on many European vehicles.
