For Import and Domestic Cars and Trucks

Tire Pressure Monitoring System Accessory Kit Assortment – TPM6100SK

Standard's TPMS Accessory Kit is the perfect service assortment for the technician or service repair shop. Packed in a rugged tackle box, this service assortment contains the most popular replacement kits for OE—plus Electroless Cores and Valve Caps!

**Now Available
in 100 Packs**

TPM630N TPMS Plastic Valve Caps—100/box. Specially designed valve caps for TPMS valve stems with rubber washer built in.

TPM100TP TPMS Nickel Plated Valve Cores—100/box. These special electroless nickel-plated valve cores must be used with aluminum valve stems found on TPMS applications.

Here are tools that installers will need when working on TPMS systems:

TPM9000 Tire valve nut torque wrench

TPM9001 Tire valve core torque tool

Over tightening the valve cores and nuts can damage an expensive sensor. These tools prevent over-tightening.
