

# STANDARD<sup>®</sup>

## STANDARD and BWD SELECT

Standard matches the BWD Select offering of over 180 SKUs

### DIS Ignition Coils

- Pure copper windings in both bobbins
- Improved durability and higher resistance to internal shorts and dielectric breakdown
- Coil can run hotter without breaking down
- Full E-Lam core of silicon steel
- Maximum output voltage
- Solid brass high voltage terminals
- Better connections and greater corrosion resistance
- Provides maximum performance and longevity

### Distributor Caps

- Brass terminals
- Glass filled polyester resin for optimum performance
- Better resistance to corrosion and pitting
- Equal to or better than the original
- Designed and manufactured with the finest materials and OE improvements
- Provides maximum performance and longevity

## CHOOSE INTELLIGENTLY WITH STANDARD

As the leading manufacturer of engine management products, Standard has earned a reputation for producing quality components that exceed all expectations. Because we are a basic manufacturer, we control the production process from beginning to end, resulting in consistently superior parts which are always equal to or better than OE.

To meet your needs, we offer the choice of Standard Tru-Tech and Standard T-Series lines, in addition to our premium Standard line. We are continually improving our products by investing in research and development, as well as upgrading and expanding the lines to ensure that we always have the best parts in the aftermarket. Standard carries over 30,000 SKUs, including a wide variety of engine management products for import and domestic cars and light trucks. With ninety years of expertise behind us, our customer service and training are considered to be second to none.

Standard's products have the ideal balance of form, fit and function; a replacement part with enhanced design and superior performance. When the OE part fails...trust Standard.

## THE INTELLIGENT CHOICE

INTELLIGENT  
SOLUTIONS

STANDARD • TRU-TECH • T-SERIES

“When OE fails... trust Standard.”

# CHOOSE INTELLIGENTLY. CHOOSE STANDARD.

## STANDARD and BWD

Standard and BWD offer over 30,000 SKUs

### Tire Pressure Monitoring Sensors

- Standard's hi-tech sensors have the broadest coverage in the industry. Our sensor offering includes accelerator pedal sensors, knock, anti-lock brake, air charge, coolant temp, manifold absolute pressure, barometric pressure, throttle position, vehicle speed, and mass air flow sensors
- Standard offers a perfect-fit tire pressure sensor for import and domestic coverage

- Valve Stem Type Direct TPMS - Illuminates the TPMS warning light when tires are significantly under-inflated
- Valve Stem TPMS Kits - Contain new seal, washer, valve nut, valve cap, and a nickel-plated valve core
- Banded Type Direct TPMS - Mounted directly to the wheel by a band and a carrier located inside the tire

### Fuel Injectors

- Standard offers a complete fuel injection program: throttle body injectors and multi-port fuel injectors, pressure regulators, gas and diesel
- Application-specific and precision-engineered to the original vehicle manufacturer's specifications for a perfect fit and performance

- The coil is made with high quality insulated copper wire for fewer electrical shorts
- They have the same fine spray patterns as originally specified, allowing for optimum engine performance and fuel economy

## STANDARD TRU-TECH and BWD PACESETTER

Tru-Tech consists of nearly 1200 SKUs, Pacesetter consists of just over 1100 SKUs

### EGR Valves

- Tru-Tech offers OE replacement parts for popular products, matching the original design
- Standard's EGR valves have the ideal balance of form, fit and function
- Original design offers extended durability
- Valve has an improved anti-rust coating on the machine casting for additional protection against rust and corrosion

### Distributor Rotors

- Matches the original, designed with the professional installer in mind
- Uses durable phenolic plastic for long life
- Stainless steel spring for OE performance

### Standard Meets Your Needs

At Standard, we believe it is important to offer you a choice of products in order to help you meet your market needs. With this in mind, we developed a series of differentiated lines to do just that. The Standard product offering now consists of Standard Tru-Tech and Standard T-Series, in addition to the premium Standard brand line, giving you the selection of good, better or best, while still maintaining our commitment to the finest quality and technology. Each line has its own unique characteristics so you can make an intelligent choice based on your individual requirements. Standard is dedicated to being the best for both you and your customers.

## STANDARD T-SERIES and BWD Z-SERIES

Standard Brand T-Series and BWD Z-Series both have over 300 SKUs

### Relays

- Standard T-Series contains popular Tru-Tech part numbers in a new brand to help you compete in markets where needed
- Standard relays are a perfect match to OE form, fit and function demanded by today's top technicians
- Standard offers accessory and electronic relays for late model and older applications

- ABS
- Air Conditioner Systems
- Delay Switches
- Alarm Systems
- Turn Signals
- Control System
- And many other systems

### Distributor Caps

- Popular T-Series distributor caps help you compete in the most competitive markets
- OE replacement
- Aluminum terminals
- A competitively priced line containing the most popular SKUs

- Made of a high dielectric strength, reinforced polyester resin
- Less carbon tracking, superior resistance to electrical breakdown
