

OUR DIESEL COVERAGE OWNS THE ROAD

Standard's Diesel Program features thousands of precision-engineered components for diesel trucks, including more than 350 components for the 2015-2019 Ford F-250.

Popular products for the 2015-19 Ford F-250 Power Stroke include:

Camshaft Sensors

Fuel Injection Throttle Bodies

Diesel Exhaust Fluid Injector Feed Lines

Glow Plugs

Diesel Exhaust Fluid Pumps

MAP Sensors

Diesel Exhaust Particulate Sensors

New and Reman Diesel Injectors

EGR Valves

New and Reman Turbocharger Kits

Engine Oil Separators

Nitrogen Oxide Sensors

Exhaust Gas Temperature Sensors

Oil Pressure Switches

Four Wheel Drive Actuators

Transfer Case Motors

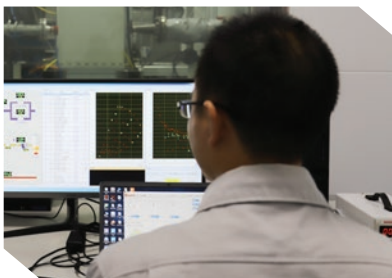

Fuel Injector Seal Kits

And More...

About Standard Motor Products

With over 100 years of engineering and manufacturing experience, Standard Motor Products is a trusted leader in the industry. We supply precision-engineered components to major aftermarket and heavy-duty distributors, as well as to new vehicle manufacturers.

Research and Development

We have 15 of our own design and development centers strategically located around the world including New York, South Carolina, Germany and Poland.

Precision Manufacturing

From start to finish, we are an expert manufacturer with 21 manufacturing facilities. SMP manufacturing plants are IATF 16949, ISO 9001 and ISO 1400-certified.

Testing and Validation

Our products are rigorously tested in the lab for performance and durability. Additionally, new items, including Diesel Turbochargers, are extensively tested on actual trucks at our Vehicle Testing Center in Texas.

Leading Coverage

Standard® offers thousands of high-quality, precision-engineered parts across more than 100 categories for medium-and light-duty diesel trucks.

Sales Support

We provide diesel-specific training classes, technical videos, and marketing materials, developed to better support Diesel Technicians.
