OE-Match TPMS Sensors

With 120+ units providing more than 98% coverage, Standard® OE-Match Direct-Fit TPMS Sensors are engineered to match the fit, form, and function of the vehicle's original sensor. Plus, Standard® OE-Matching TPMS sensors come programmed from the factory, so they can be installed right out of the box. Once installed, just follow the OE-relearn procedure using any major TPMS programming tool.

Runs November 7, 2016 – March 31, 2017

TPM5010 TPMS Service Tool Kit

The Standard® TPM5010 TPMS Service Tool Kit contains all of the tools you need to manage your TPMS service, including a 1/4" torque wrench 30-150 in/lbs, 1/4" torque screwdriver, valve core torque tool, and rugged tool case complete with a thumb valve core installation and bleeder tool, grommet pick, and grommet removal and installation tool.
