T55001 TPMS Tool UPDATE

Here's all you need to do get your FREE update.

1. Follow your normal software update procedure provided with your tool.
2. Before connecting to your PC check that SD card is installed in SD card slot (if you don't have an SD card we will be glad to supply one to you, simply contact us at 718-729-4357)
3. Start the webTPM software
4. You will be asked to register your tool.
5. Once registered click on the "Update Device" button
6. Once the software update is complete you will have the NEW QWIK-SENSOR™ software in your T55001 tool and a new 1 year subscription.

QWIK-SENSOR™

is a new Multi-Coverage TPMS Sensor featuring easy programming, innovative technology and complete coverage.

www.QWIKSENSOR.com

- » 3 QWIK-SENSORS provide 94% coverage for Domestic, Asian and European applications
- » Each number is available in two valve stems, rubber or metal, to match the proper application
- » All QWIK-SENSOR™ TPMS sensors come fully assembled from the factory, ready to install when activated – no valve changes
- » Easily programmed; works with all major TPMS tools
- » ID clone-able or can be OE-relearned
- » Color-coded for easy identification
