

« JUST THE FACTS »

Gasoline Direct Injection (GDI)

Standard® and Intermotor® are leading the way with Gasoline Direct Injection (GDI) coverage, quality, and everything needed for a complete repair. Standard® and Intermotor® advanced **ALL NEW** flow-matched GDI injectors promote smooth engine operation and balanced fuel delivery, reducing overall fuel consumption and harmful emissions.

Stainless steel calibration slide and spring assembly prevents corrosion within fuel control body leading to extended service life

Precision wound and trimmed solenoid windings allow computer to command efficient fuel delivery

High-temp Viton® O-rings enable prolonged sealing of injector under extreme heat conditions
