WHAT'S IN YOUR BOX?

Here's What's In Ours.

Since 1919, Standard® has been known for premium automotive quality with parts that are always engineered for superior performance and durability.

Inside the Standard® and Blue Streak® box you'll find advanced engineering, superior manufacturing and 100+ years of expertise. You can count on premium quality every time you open a Standard® and Blue Streak® box.

Now you know what's in our box, here's what's behind it.

At the heart of SMP has been a set of core values that have remained consistent from day one:

- Premium products and premium brands
- Commitment to expert manufacturing – from raw material to end-of-line testing
- Precise catalog data, award-winning training and world-class marketing support
- Customer care from a salesforce that's second to none
- Time-tested ability to adapt to the latest automotive technologies
- But most of all, a commitment to integrity

For more than 100 years, when the OE failed, technicians trusted Standard® and Blue Streak® to deliver a part that's equal to or better than the original it's replacing.

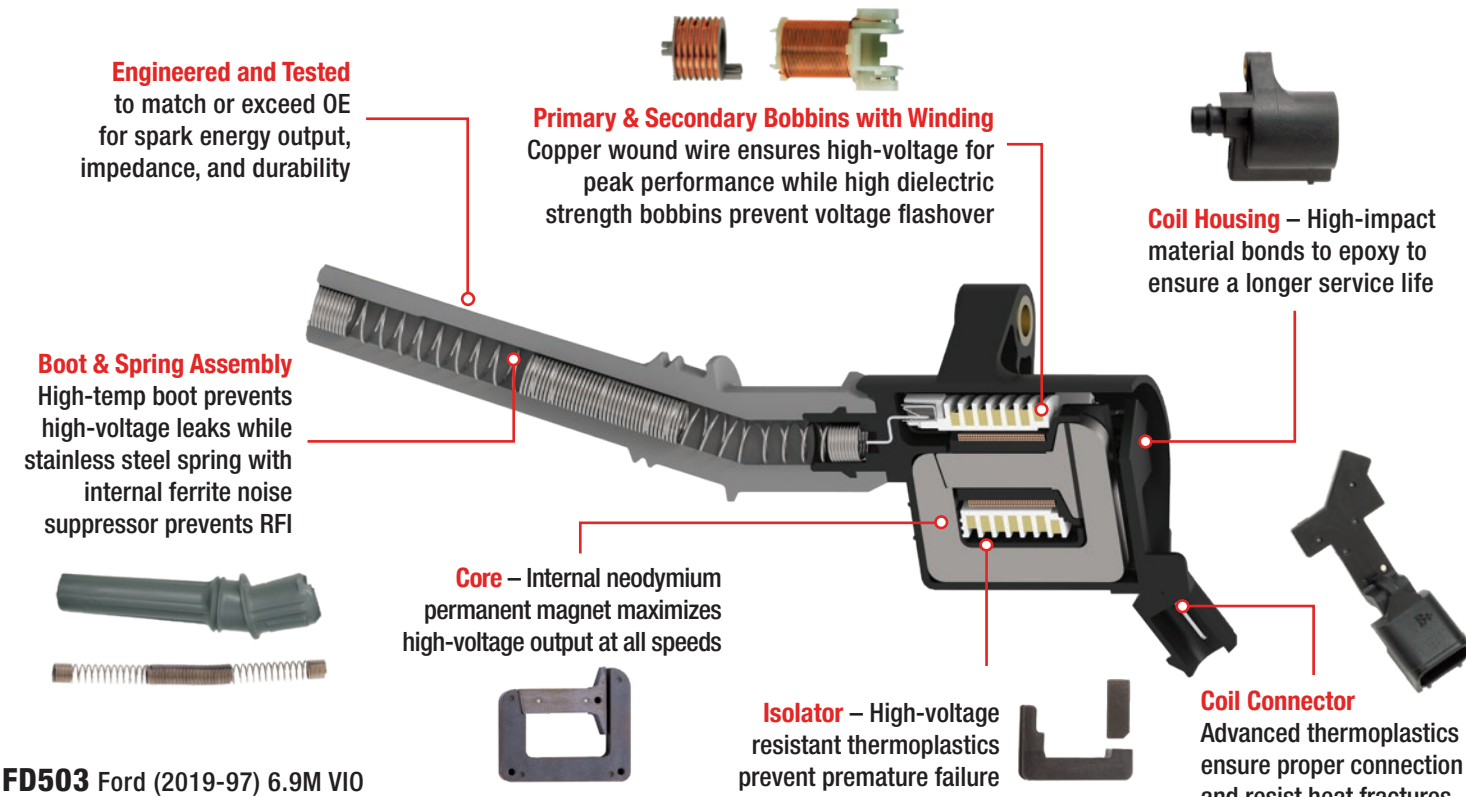

WHAT'S NEW IGNITION COILS

Expertly manufactured at SMP Poland, our most advanced facility, and subjected to extensive testing and validation.

Our coils undergo rigorous examination and product validation, including extensive measurement and life testing, and a full range of environmental analysis. We go to these lengths to ensure 100% product reliability, so you can install every Standard®, Blue Streak®, and Intermotor® ignition coil with confidence.

We pay strict attention to the details.

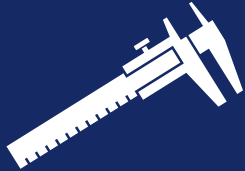

FD503 Ford (2019-97) 6.9M V10

800+ SKUs

AFTERMARKET LEADING COVERAGE

We offer more than 800 coils for 99% aftermarket-leading coverage

STANDARD® IMPROVEMENTS

We design the Standard® coil to overcome the OE flaws

STANDARD® RELIABILITY

We manufacture a more reliable, better performing ignition coil

WHAT'S NEW

SINGLE SENSOR TPMS PROGRAM

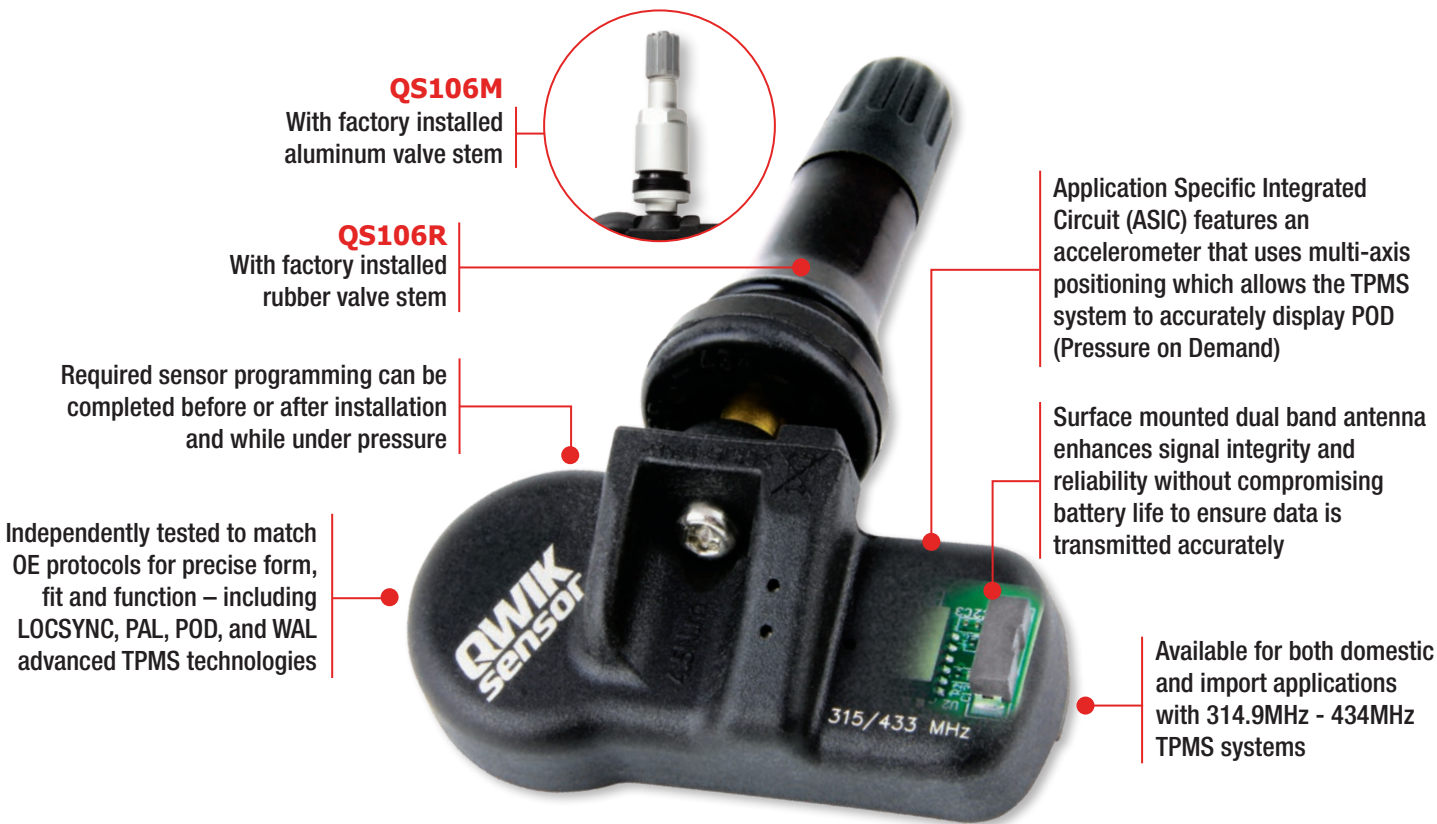

Introducing The New QWIK-SENSOR® Multi-Frequency TPMS Sensor.

Complementing our OE-Match TPMS sensor line, Standard® has recently introduced the QWIK-SENSOR® Multi-Frequency TPMS sensor. Faster programming times, surface-mounted dual band antenna, and longer battery life are just a few of the enhancements engineered into the QWIK-SENSOR® QS106.

One Single Sensor is All You Need.

WHAT'S NEW

ADAS

This is what a complete, top quality ADAS program looks like.

Standard® will continue to expand our ADAS line to provide the coverage and quality needed to meet these growing repair opportunities.

Blind Spot Detection Sensors

Park Assist Cameras

Lane Departure System Cameras

Cruise Control Distance Sensors

Park Assist Sensors

No special tooling required... just plug and play.

Park Assist Sensors and Park Assist Cameras are two of the most prevalent safety features on today's vehicles. Due to their locations, they are prone to damage, even from minor collisions. Standard® park assist sensors and cameras are plug and play* – easy to install with no special tooling or calibration needed.

*Certain applications with more advanced systems may require additional relearn or calibration procedures

Blue Streak® Expansion

Our Blue Streak® program is built upon a rich history of quality and durability that continues to grow and improve. We've added 3 exciting new categories – Import Ignition Coils, VVT Kits, and Camshaft Sensor Kits.

NEW Blue Streak® Premium Import Ignition Coils

These import coils deliver the features and competitive benefits that comes from the superior design, engineering, and testing that Blue Streak® is known for.

- 10 import SKUs covering more than 27 million VIO
- Additional numbers will be released in 2022 as we increase our coverage for import applications

NEW Blue Streak® Camshaft Sensor Kits

- Each premium Blue Streak® kit contains two camshaft sensors along with the needed high-quality connectors to replace the melted/damaged originals

Blue Streak® Popular Nissan Camshaft Sensor Kits

PC458K	PC460K	PC462K
 <p>2 each</p> <p>2 each</p>	 <p>1 each</p> <p>1 each</p> <p>2 each</p>	 <p>2 each</p> <p>2 each</p>

NEW Blue Streak® Variable Valve Timing Kits

- **VVT420K** Ford 5.4L Variable Valve Timing Kit (VIO Over 2.6M)
- For a complete job and to reduce comebacks, replace all related timing chain components in the VVT system with high-quality Standard® or Blue Streak® VVT components

Blue Streak® Heavier-Duty Ignition Coils

- 50+ heavier-duty Blue Streak® coils now available
- All Blue Streak coils are a product of superior design, manufacturing, and testing including many improvements over the original

Blue Streak® VVT Solenoids and Sprockets

- Engineering improvements designed into every Blue Streak® VVT Solenoid and Sprocket
- Additional coverage for 2022

Blue Streak® Blower Motor Resistor Kits

- 19 SKUs now available (30M VIO)
- Kits include high-quality resistor and problem-solving high-temp connector
- **RU1000RK & RU1001RK** Full-Service kits now available
 - Kits include blower motor, blower motor resistor, and connector
- Blue Streak® improved on the OE design to deliver a connector that withstands the excessive heat and protects against future failure

Backed by our
LIMITED LIFETIME WARRANTY

We are so confident in the durability of our Blue Streak® products, that we've backed every part with our Limited Lifetime Warranty.

WHAT'S NEW VARIABLE VALVE TIMING (VVT)

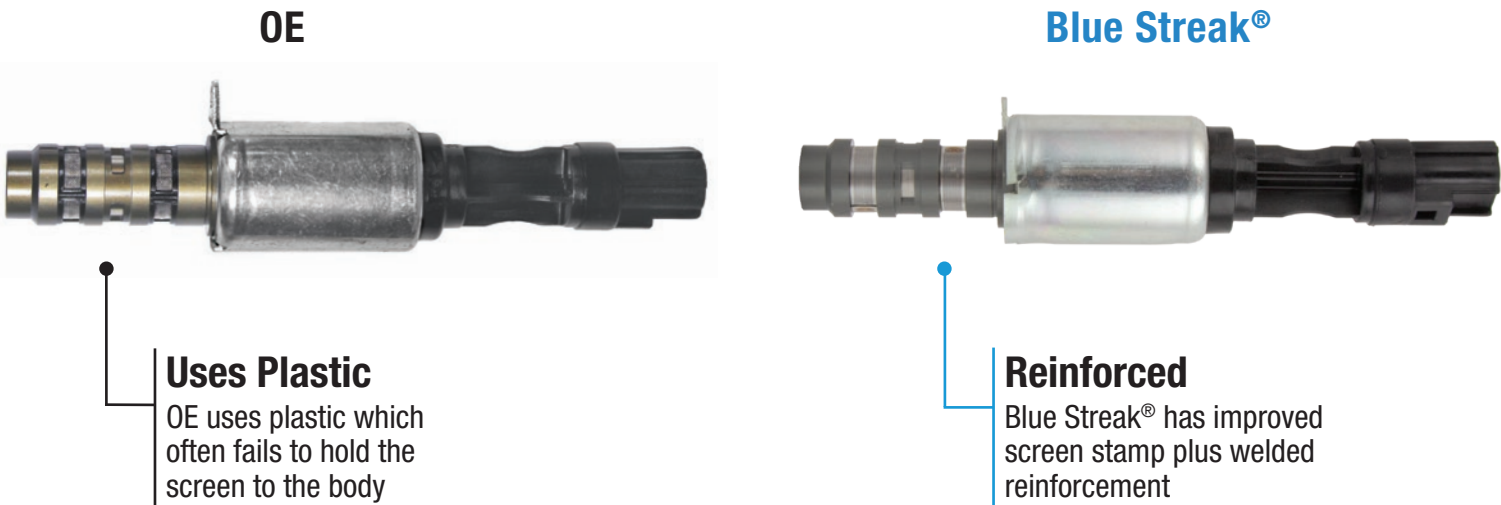

Aftermarket-Leading VVT Coverage

Standard®, Blue Streak®, and Intermotor® lines team up to offer more than 500 premium VVT components covering more than 95% of all domestic and import applications. That's top in the industry!

Standard® Blue Streak® Design Improvements Over the Original

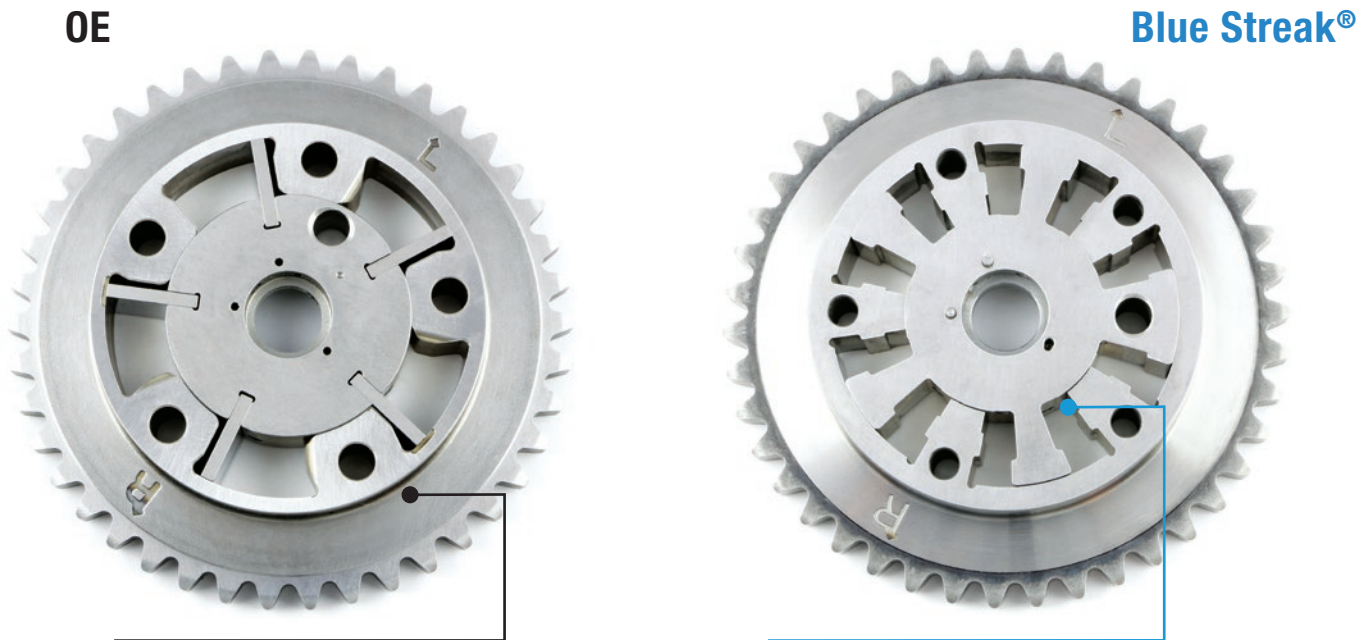

Our improved screen stamp and welded reinforcement are the result of the Blue Streak® commitment to high-quality design and rigorous testing.

Source: SMP Testing Lab, 2021

Standard® Blue Streak® Engineers Have Improved on the Original

Our all-metal, integrated machined design eliminates paddle inserts while providing a larger contact area. This means improved overall wear as well as proper lubrication and gap. Less friction means our sprocket responds fast at lower pressure delivering optimal performance.

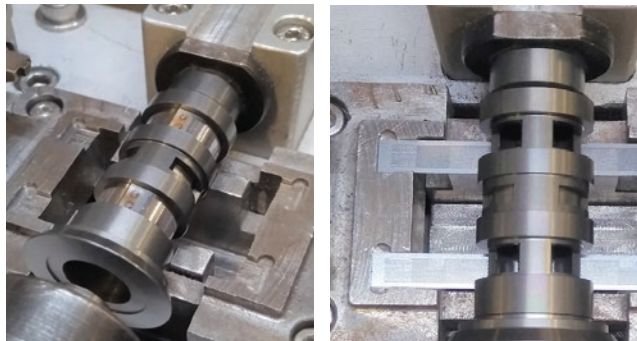

Original – Metal Paddles

- Inserted metal paddles produce iron shavings
- Paddles wear rapidly
- Impedes performance
- Shortens service life

Best – Integrated Design

- Larger contact area
- No paddle to wear out
- Fast response times
- Improved performance
- Longer service life

Source: SMP Testing Lab, 2021

Commitment to Continuous Improvement

Our dedication to continuous improvement practices in design, engineering and manufacturing allows us to make enhancements to the OE design, while maintaining complete control over every Standard®, Blue Streak®, and Intermotor® VVT component.

500+ SKUs

The most comprehensive VVT line in the aftermarket

PREMIUM QUALITY

Many of our VVTs include value-adds such as gaskets for a trouble-free install

100% TESTED

Our extreme testing regimen ensures precise performance and longevity

WHAT'S NEW ELECTRONIC THROTTLE BODIES

The Most Comprehensive ETB Line in the Aftermarket

High OEM failure rates make ETBs a key aftermarket category.

When the original fails, it affects a vehicle’s power, fuel economy, and drivability. Always replace the failed original with a high-quality Standard® ETB.

We include gaskets for required applications

Optimal performance begins with quality components.

Magnet molded in high-performance polymer to ensure consistent location and low friction with bearing surfaces

100% calibration and extensive testing ensures superior performance and reliability

Custom elastomeric seal protects sensor from environmental underhood elements such as dust, vapor, and liquids

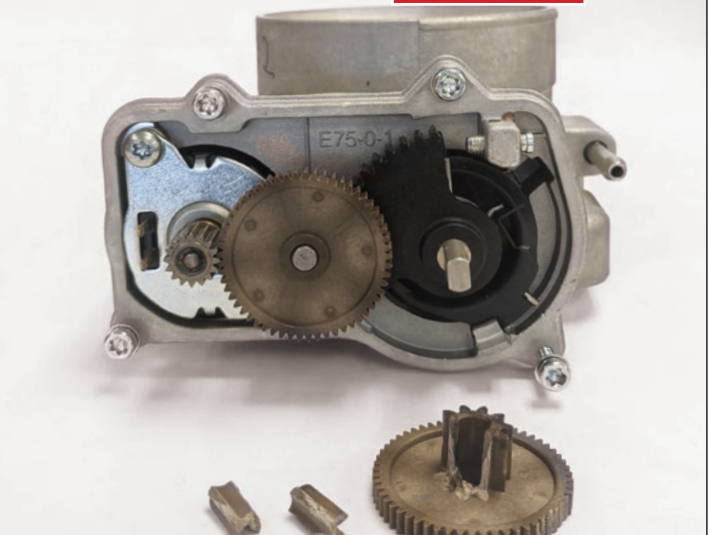

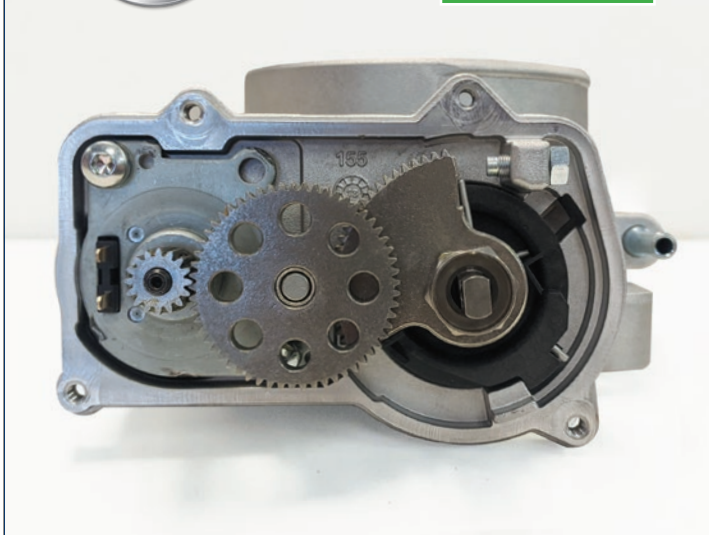

New, never remanufactured, which maximizes performance and extends service life

Precision machined throttle plate and shaft to ensure proper weight, balance and throttle response

S20120
Chrysler (2010-06)
Dodge (2011-05)
VIO over 1.9 million

Our ETBs are the result of superior design and the testing proves it.

Standard® Electronic Throttle Body’s superior quality stands up to the most severe underhood conditions and strenuous demands of today’s engines – the competition did not.

COMPETITION	FAILED	STANDARD S20006	PASSED
 <ul style="list-style-type: none">After only 10 days of testing, the competitor ETB failed with a cracked compound gearInherent design flaws rendered the competitor unit unusable		 <ul style="list-style-type: none">Even after 45 days of endurance testing, our ETB was intact and fully operationalStandard® delivers a premium-quality ETB that performs under the toughest conditions	

Source: SMP Testing Lab, 2021

200+ SKUs

We offer more than 200 ETBs covering 190 Million VIO

100% NEW, Not Reman

Every electronic throttle body is 100% new, never remanufactured

100% CALIBRATED

100% calibration and testing ensure superior performance and durability

All SMP-manufactured ETBs are built in our North American IATF 16949-certified facility

WHAT'S NEW

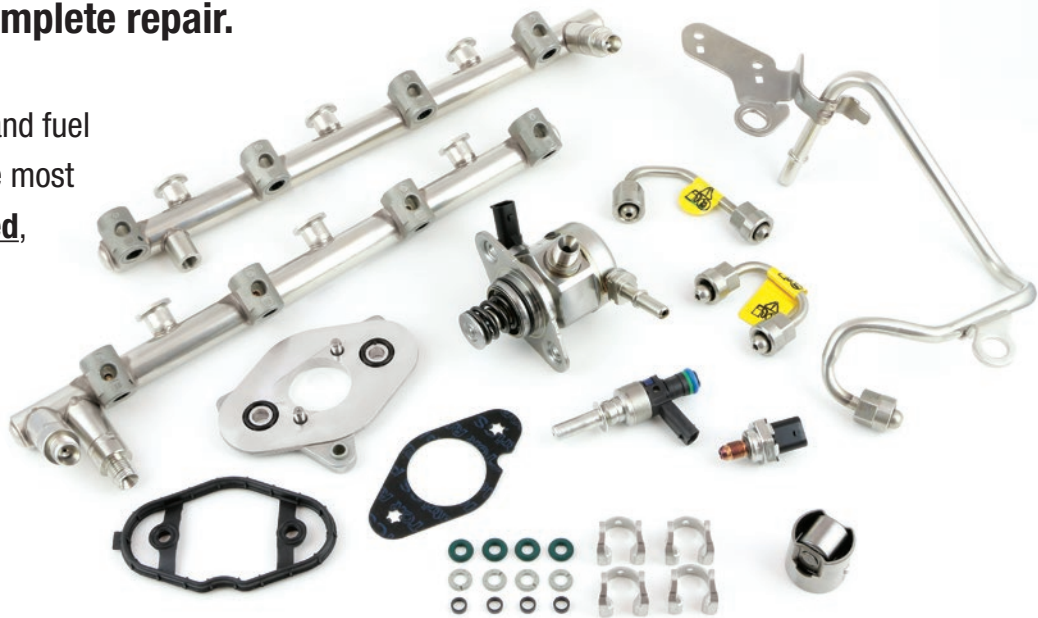

GDI GAS INJECTION

Standard® is Your Full-Line GDI Supplier.

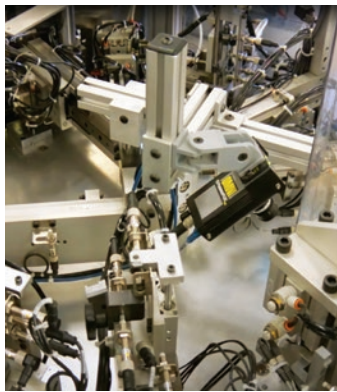

Everything needed for a complete repair.

As the aftermarket's fuel injection and fuel system leader, Standard® offers the most complete new, not remanufactured, GDI program – **GDI Fuel Injectors, GDI High-Pressure Fuel Pumps, GDI Fuel Feed Lines, GDI O-Rings, Gaskets, Seal Kits, GDI Service Kits, Camshaft Followers and more!**

Quality components, expert manufacturing and extensive testing.

- Standard® delivers more than 1,000 New fuel injectors
- Engineered and manufactured at our IATF 16949-certified facility in Greenville, SC
- Advanced flow-matched to each specific application for balanced fuel delivery
- All Standard® injectors are 100% tested – more than 35 different tests

Standard® gas injectors are New, not remanufactured. Here's why.

Most GDIs can't be remanufactured because they cannot be disassembled to replace worn and failed components. Yet several aftermarket companies offer GDI reman programs – the problem is, the injector isn't rebuilt, it's only cleaned and the internal components are more likely to fail sooner. That's why we only offer pristine, NEW gas injectors that will deliver optimal performance and longevity.

Standard® GDI Fuel Injectors: A Closer Look

Stainless steel calibration slide and spring assembly prevents corrosion within fuel control body leading to extended service life

Precision wound and trimmed solenoid windings allow computer to command efficient fuel delivery

High-temp Viton® O-rings enable prolonged sealing of injector under extreme heat conditions

Included retaining clip keeps the injector in position while protecting against vibration

Additional O-rings and umbrella seals are included to ensure a trouble-free install

Standard® FJ1217

WHAT'S NEW ABS SENSORS

We include the quality and extras you need to ensure a proper install.

Rigorous ABS Sensor testing means a more reliable sensor.

We perform **extensive laboratory and real-life testing** that includes evaluating the following:

- Shaft speed vs. delta voltage
- Output voltage and variation to OE
- Magnetic field strength and air gap
- Output wave form and pulse width

Program Highlights

- Complete coverage for domestic and import applications
- Consistency in matching OE for form, fit, and critical function
- Superior quality control with extensive laboratory and real-life product testing

More than 2,500 SKUs and 96% coverage for domestic and import applications

ABS sensors perform flawlessly matching the OE for form, fit, and critical function

Superior quality control with extensive laboratory and real-life ABS sensor testing

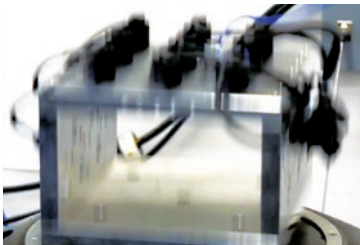

WHAT'S NEW CAM/CRANK SENSORS

No One Tests Like We Do

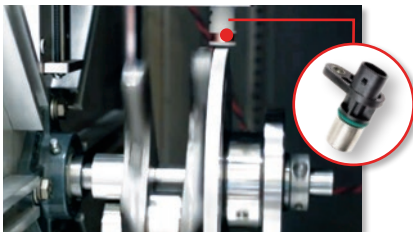

OUR 48-HOUR VIBRATION TEST ENSURES DURABILITY

Sensors undergo 48-64 hour vibration testing across three different planes to ensure a long service life under the harshest conditions

OUR CHAMBER TESTING ENSURES PERFORMANCE

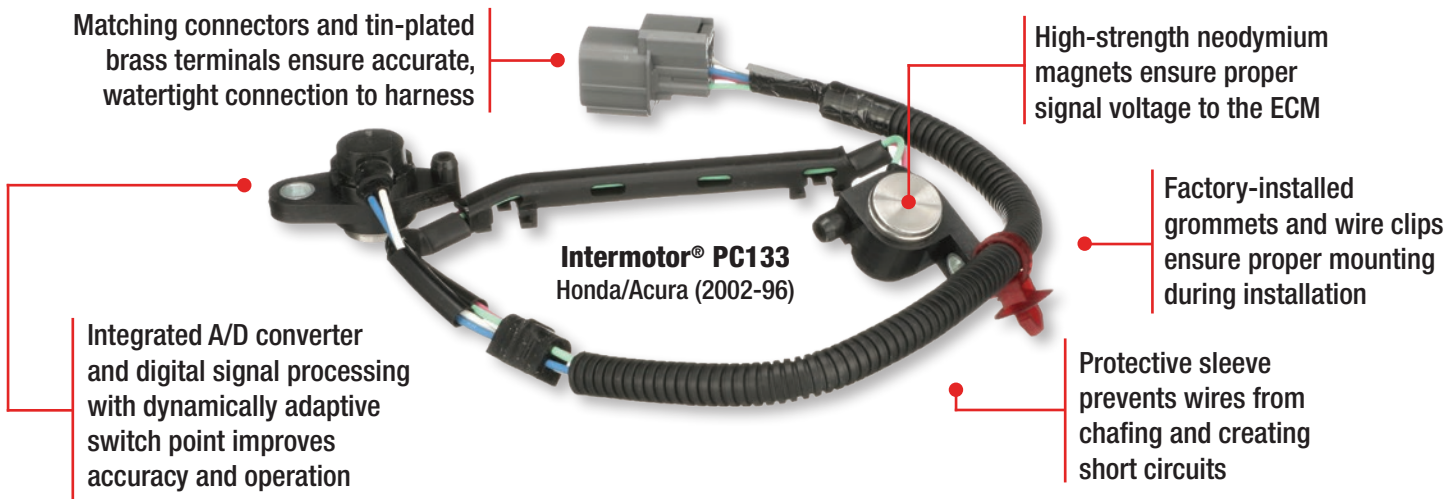

Chamber testing cycles from -40°F to 257°F to ensure optimal operation in extreme temperatures

WHAT OUR TESTING MEANS FOR YOU

Standard® cam / crank sensors protect against short circuits and over, under, and reverse voltage to deliver precision performance and a long service life under all operating conditions

Quality Designed. Quality Built.

WHAT'S NEW EVAP SYSTEMS

Standard® EVAP line offers the quality and coverage that professional technicians need to keep vehicles running clean.

ESIM (EVAPORATIVE SYSTEM INTEGRITY MODULE)

The ESIM is a key component of the EVAP system detecting pressure differences across a variety of conditions.

CANISTER PURGE VALVES

Standard's canister purge valves are designed to look, fit, and perform like the original they replace.

CANISTER VENT VALVES

Manufactured using the highest-quality materials to withstand extreme conditions, and extensive testing for continued reliability.

FUEL VAPOR CANISTERS

We lead the market with high-quality fuel vapor canisters built from industrial-grade materials for robust performance and extended service life.

CANISTER VENT SOLENOIDS

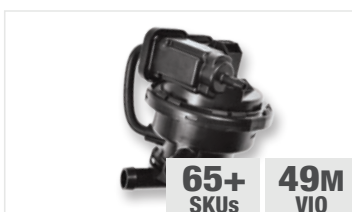

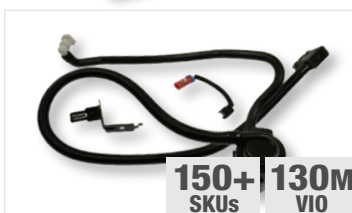

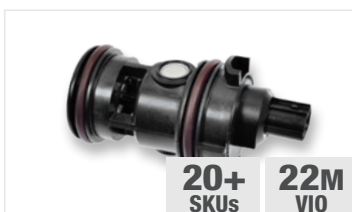

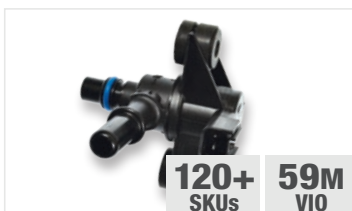

100% tested with superior resistance to environmental influences due to proprietary one-piece molding.

CANISTER PURGE SOLENOIDS

Manufactured at our IATF 16949-certified facility, Standard® direct-fit canister solenoids feature premium quality connectors and terminals for proper fit, form, and function.

LEAK DETECTION PUMPS

A full line of direct-fit, premium quality leak detection pumps.

YF Tools & Service Items Kit
P/N 99804

R-1234YF refrigerant is here to stay. Nearly 70 million vehicles on the road today use YF refrigerant and the majority of these vehicles are beyond warranty and at peak repair age. Now more than ever, repair shops should be prepared to service these vehicles or risk losing sales. Four Seasons® YF Tools & Service Items Kit, part number 99804, includes the YF Refrigerant Leak Detector, YF Manifold Gauge Set and YF Can Taps for your next YF A/C repair.

P/N 99804 Includes:

P/N	Description
59203	YF Manifold Gauge Set
69010	YF Refrigerant Leak Detector
59011	Self-Sealing YF Can Tap
59016	Puncture YF Can Tap

P/N 59203 Features:

- Anti-flutter gauges for smooth operation
- Easy to read temperature gauge scales
- Color coded anodized front-facing knobs
- Easy gauge recalibration ensures accuracy
- Large sight glass for visual check of refrigerant

59203 Kit Includes

- (3) 72" hoses
 - P/N 59081 Blue hose
 - P/N 59082 Yellow hose
 - P/N 59083 Red hose
- 2 color coded anodized couplers
 - P/N 59084 High side gauge
 - P/N 59085 Low side gauge

P/N 69010 Features:

- 15.5" flexible test probe
- Infrared gas sensor
- Automatic zero and background compensation
- High/Medium/Low leak sensitivity selector
- Carrying case included

**AIR DOOR
ACTUATOR KITS**

INSTALLER SOLUTIONS

Four Seasons®, your complete source for premium HVAC products, introduces NEW Air Door Actuator Kits. This new line of 10 popular application specific kits cover over 21 million vehicles on the road today. With precision gears, quality motors and premium circuitry, Four Seasons® Air Door Actuators undergo thorough testing to ensure every air door actuator matches O.E. fit and performance.

SAVE
Time and Labor

21M+ VIO

For O.E. Fit & Form

CONVENIENTLY
Packaged

WHY FOUR SEASONS® AIR DOOR ACTUATOR KITS?

With as many as eight Air Door Actuators per application, replacing actuators one-by-one can be a costly and labor intensive repair. Removing the entire dash panel can cost upwards of eight labor hours at over \$100 per hour at today's shop rates.

- Four Seasons® Air Door Actuator Kits reduce time and labor by combining all actuators into one convenient kit, allowing all actuators in a common location to be replaced at the same time.
- No more waiting for the right part or repeat repair costs for items that have a common service life.

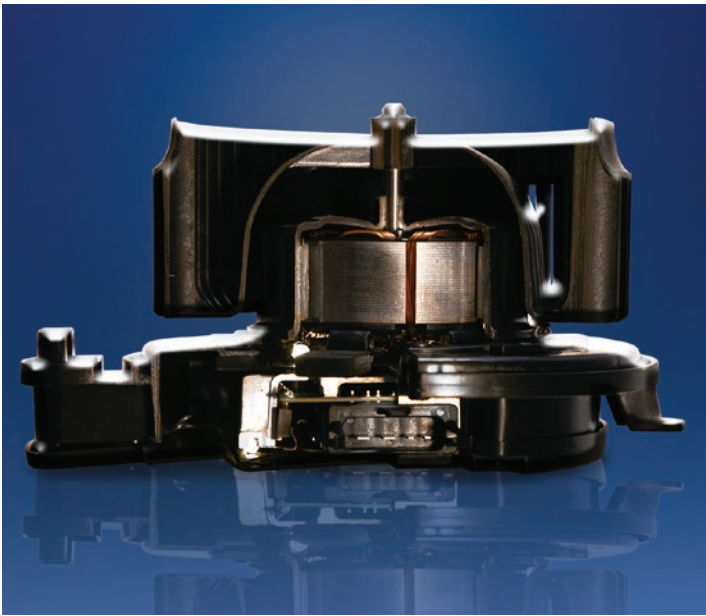

Do it once, do it right with Four Seasons® Air Door Actuator Kits!

Visit www.4s.com for more kit information and other quality HVAC products.

TECHNOLOGICAL ADVANCEMENTS

Brushless motor technology has been around since the mid-1990s and is now used in the majority of vehicles produced today. This growing technology is showing up in repair facilities around the country and quality replacements are in high demand. The automotive aftermarket has seen significant growth since O.E. manufacturers began using this advanced technology and manufacturers such as Ford, GM and Toyota use brushless motors almost exclusively. As a basic manufacturer, Four Seasons® has invested in the tooling, engineering, design and production of brushless technology. This investment was made to meet the demands of this growing category and to supply our customers with best-in-class quality products.

+94%
Coverage

COMMITTED
Line Expansion

INVESTMENT
in Technology

Features and Benefits of Brushless Blower Motors

- Custom Wheel Design
- Sensorless Open-Loop Commutation
- EMI Suppression
- Soft Stall and Hard Stall Protection
- Over-Current Limit Protection
- Soft Start / Stop Acceleration
- Hermetically Sealed Electronics
- Integrated Cooling
- Electronic Thermal Self-Protection

Four Seasons® has the quality, coverage and service you expect from a full-line basic manufacturer.

With most major auto makers planning for the future and transitioning away from ICE vehicles within the next decade, Four Seasons® has also invested in this technological shift. Our joint venture with a premium electric compressor manufacturer and the addition of many other kits and components for Non-ICE application vehicles confirms our commitment to this new era. Four Seasons® core strategy to be the best full-line, full-service supplier of premium temperature control products goes beyond the vehicles of today and looks forward to servicing our customer's needs for vehicles of the future.

AVAILABLE HYBRID / ELECTRIC CATEGORIES

- Clutchless scroll design new compressors for EVs
 - Coverage includes Ford, Lincoln, Mercury, Toyota, Lexus, Hyundai, and Kia Applications
- A/C Installer Kits available to accompany EV compressor replacement

BRUSHLESS
A WINNING COMBINATION

INCREASE SALES & PROFITABILITY

A successful compressor replacement requires all of the necessary components to be replaced to do the job right. Pair a Four Seasons® quality remanufactured compressor with a PAC-Kit® A/C Service Kit to help increase sales and reduce warranty when all of these components are replaced together.

= A WINNING COMBINATION

In a recent analysis, reman compressor warranty was reduced nearly 2% when sold with a PAC-Kit®

Four Seasons® Remanufactured Compressors

100% TESTED

Function, vacuum decay, pressure decay & submersion tested

100% INSPECTED

Each unit is inspected for clutch gap correctness, appropriate oil charge and aesthetic correctness.

100% VALIDATED

Every manufacturing lot is subject to random selection for durability testing equivalent to 100,000 miles of real world function

100% of our Remanufactured Compressors are produced in North America

PAC-KITS® A/C Service Kits

Assembled and shipped in one convenient package with all of the components you need to accompany an A/C compressor, ensuring a successful repair.

ECV Diagnostic Tool & Harness Kit
P/N 99803

Available February 1st - July 31st, 2022

Now for a limited time, Four Seasons® is offering our popular ECV Diagnostic Tool Kit at a great low price. WITH THIS PROMOTION ONLY, five new harness connectors, fitting a wider range of applications, are included absolutely free. The 99803 promotion kit features special pricing and increased coverage for late model import and domestic applications. Plug-and-play diagnostics for one low price.

+

\$60 Shop Value Free!

Only available separately outside of this promotion

Diagnosing today's A/C compressors takes more than a set of gauges and a spanner wrench. Vehicle manufactures utilize newer technology that requires special tools, training and investment. Repair shops today have to maintain the proper tools and equipment to diagnose these advanced components. The Four Seasons® ECV Diagnostic Tool allows you to properly diagnose ECV compressors by putting you in control of the pumping displacement, making diagnosis simple and easy!

P/N 99803 Includes:

Part Number	Description	Application
69636	ECV Diagnostic Tool Kit	All ECV Model Applications
26902	Male Harness Connector	Jaguar, Volvo and Land Rover
26903	Female Harness Connector	BMW
26904	Female Harness Connector	Jaguar and Land Rover
26905	Female Harness Connector	GM, Ford and Honda
26906	Female Harness Connector	BMW and Mini
