Diesel Fuel Injectors (CRI) - Remanufactured

The Product of a Superior Remanufacturing Process

Named after the shared high-pressure rail that supplies cylinders with fuel, the Common Rail Injection (CRI) system is an advanced technology for diesel engines. For conventional diesel injection systems, fuel pressure needs to be generated for each individual injector. For Common Rail systems, pressure generation and injection are separate, meaning the fuel is constantly available at the required pressure for injection.

To ensure superior performance and reliability, all Standard® Diesel Fuel Injectors, including Common Rail Injectors (CRI), undergo an exhaustive remanufacturing process at a TS16949, ISO9001, and ISO14001-certified facility. To see what goes into our remanufactured CRI injectors, take a look at our FJ960:

Common Rail Injectors (CRI) – Diesel Top Sellers

Here are some of our top selling Remanufactured Diesel Fuel Injectors for Common Rail Injection (CRI) systems:

FJ489
GM Pickups (2005-04)

FJ495
GM Pickups (2004-01)

FJ922
Dodge Sprinters (2006-04)

FJ932
Dodge Pickups (2004-03)

FJ933
Dodge Pickups (2009-04)

FJ961
GM Pickups, Fullsize Vans (2010-07)

FJ962
GM Pickups, Fullsize Vans (2007-06)

FJ1009
Dodge Pickups (2010-08)

FJ1010
Dodge Pickups (2010-07)
