

WHAT'S IN YOUR BOX?

StandardWhatsInYourBox.com

Design improvements you've come to expect from Standard® engineers.

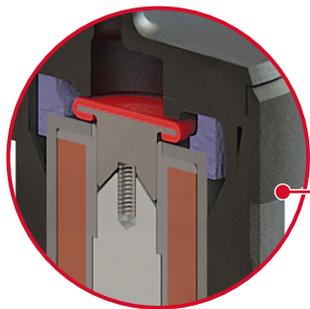

Hi-grade materials protect against the extreme temperature changes of underhood applications

OE Design

OE/Competitor flawed plunger & substandard membrane is prone to leaking, leading to product failure

The Standard® Design

Our engineers solved the OE problem. Our CP612 delivers a stronger plunger design, eliminating the flimsy OE membrane and preventing valve leakage

Standard® CP612
GM (2019-12)

Tech Tip: Consequences of a leaking canister purge valve

A leaking canister purge solenoid leads to a failure to regulate the fuel vapor flow, poor fuel efficiency, rough engine starting and running, failure to pass emission test, and OBD EVAP code.

**1,400+
SKUs**

More than 1,400 critical EVAP components for import and domestic applications

**RIGOROUS
TESTING**

EVAP components are precision-engineered and tested for flawless performance

**DESIGN
IMPROVEMENTS**

Our engineers improve on OE flaws for better performing, longer lasting EVAP components

Our EVAP components offer quality and comprehensive coverage that professional technicians need to keep vehicles running clean.

LEAK DETECTION PUMPS

A full line of direct-fit, premium quality leak detection pumps

For more than 100 years, when the OE failed, technicians trusted Standard®, Blue Streak® and Intermotor® to deliver a part that's equal to or better than the original it's replacing.
