

GAS FUEL INJECTION

WHAT'S IN YOUR BOX?

StandardWhatsInYourBox.com

The most advanced, precise gasoline fuel injectors for GDI, Multi-Port, TBI, and more.

With unmatched coverage, Standard® and Intermotor® fuel injectors are meticulously designed, manufactured, and tested to ensure consistent reliability and performance.

We have a full offering of related fuel injection components including fuel pressure sensors, pressure regulators, damper assemblies, fuel/water separator sensors, O-ring kits, and more.

What's inside the Standard® box... advanced engineering, a brand-new injector, and over 100 years of experience. What's in your box?

Precision engineering means a commitment to flow and spray pattern matching, and strict requirements for flow rates to deliver better fuel economy and emissions.

We use multiple tip shapes and multiple inserts to match OE-style spray patterns to ensure positive control of fuel delivery for maximum performance and service life.

1,000+
100% NEW
INJECTORS

More than 1,000 New,
not remanufactured,
gasoline fuel injectors

Engineered and manufactured
in our IATF 16949-certified
facility in Greenville, SC

Standard® fuel injectors are
advanced flow-matched to
each specific application for
balanced fuel delivery

We know that optimal performance begins with quality components.

Stainless steel calibration slide and spring assembly prevents corrosion within fuel control body leading to extended service life

High-temp Viton® O-rings enable prolonged sealing of injector under extreme heat conditions

Standard® FJ1217 New GDI Fuel Injector Chevy/GMC Truck (2019-14)

Precision wound and trimmed solenoid windings allow computer to command efficient fuel delivery

Included retaining clip keeps the injector in position while protecting against vibration

Additional O-rings and umbrella seals are included to ensure a trouble-free install

Quality designed. Quality Built. Quality Tested. Every time.

We perform initial life-cycle validation and 100% end-of-line testing. What's more, **we subject our fuel injectors to more than 35 different tests** and inspections including endurance, spray pattern, thermal cycles, vibration, shock load, and more. You can count on precision quality, enhanced performance, extra durability, and 100% consistent product reliability.

Standard® gasoline injectors are 100% New, not remanufactured. Here's why.

Let's look at GDI injectors. Most GDIs can't be remanufactured because they cannot be disassembled to replace worn and failed components. Yet several aftermarket companies offer GDI reman programs – The problem is, the injector isn't rebuilt, it's only cleaned and the internal components are more likely to fail sooner. That's why we only offer pristine 100% New gas injectors that will deliver optimal performance and longevity.

For more than 100 years, when the OE failed, technicians trusted Standard®, Blue Streak® and Intermotor® to deliver a part that's equal to or better than the original it's replacing.
